

COURSE : Fish and Shrimp Health Management

Summer Program

COURSE TUTOR

Professor Toshiaki ITAMI, Faculty of Agriculture, University of Miyazaki

COURSE OVERVIEW

We provide the lectures and laboratory work on the diagnostic techniques available for fish and shrimp diseases. This includes the prevention and control of these diseases. This course is open to the students in the aquaculture or mariculture field. The course is an intensive study which combines lectures and laboratory sessions to educate the students in the methods used for the detection and diagnosis of the diseases present in cultured fish and shrimp.

TEXTBOOKS AND READINGS

Required readings will be distributed. A list of further materials for each topic will be provided in order to assist students in the preparation of their class.

COMMUNICATIONS

The course tutor's details are as follows:

Office: Nougakubu Minami-to, Room S307

Tel: 0985-58-7229
